

UI Challenge

Analyze a popular app or website : 'Zomato'

Part 1: Layout Analysis

1. What are the main sections on the page?

- A banner section with a food video in the background.
- The Zomato logo and tagline.
- A brief description of the service.
- Download buttons for Google Play and App Store.
- A scroll-down indicator for exploring more content.

2. How is the content arranged?

In a centered layout. The main heading, description, and app download buttons are placed in the middle of the screen, background video covers the entire page.

3. Is the layout Left to Right or Top to Bottom?

The layout follows a Top-to-Bottom structure.

4. Is the page easy to understand and navigate?

Yes. The page is simple and easy to understand. The main purpose of the website food delivery is immediately clear, and users can quickly find the app download options.

Part 2: Visual Hierarchy Analysis

1. What is the first thing you notice on the screen?

The first thing I notice is the name 'zomato' and headline:

"India's #1 food delivery app"

2. Why did you notice it first?

The text is large and bold, and is placed at the center of the screen.

The white color text contrasts strongly against the dark food image background.

3. Does the design clearly guide your attention?

Yes. The design guides attention ,and a good design flow

1. Background food image.
2. Zomato .
3. Main headline.
4. Description text.
5. Download buttons.

Part 3: Taste Analysis

1. Does the design look modern?

The design uses a full-screen image, bold styles, and a clean layout which are used in most modern websites.

2. Does it feel professional?

Yes. The design looks professional and attracts users. The branding is consistent and well-organized.

3. Do you like the colors used?

Yes. The dark background combined with white text creates strong contrast and improves readability.

4. Are the fonts clean and easy to read?

The fonts are simple, modern, and highly readable even from a distance.

5. Is the spacing good?

Yes. There is enough spacing between the logo, heading, description, and buttons, preventing the page from looking crowded.

6. What do you like most about the design?

The most appealing aspect is the food video in the background, which instantly communicates the purpose of the website and attracts the user's attention.

7. What would you improve?

I would add a navigation menu or quick links at the top of the page so that users can access different sections more easily without scrolling, reduce the size of the download logos.

Take a screenshot of the home screen or homepage.
